For the Hartford Herald. MAKING UP DOUGH.

BY ALEX. H. CUMMINS.

'Twas a beautiful evening, And sweet shone the moon, Her soft rays were as hright As mid-day in June, As away to the well I concluded to go, Where a beautiful girl Was making np dough.

The tea-kettle at home Was simmering low, For want of the fluid To hoil it, you know. So I drew up the water, Reluctant and slow, And gazed long at the girl A making up dough.

I sat down to the table Quite thoughtful and said. The "Young Hyson" was weak, The beef steak was bad, Se I took up a hiscuit, Quite natural, you know, And I thought of the girl A making up dough.

I dreamed in my sleep, White the stars shone above, Like so many warm bisenits, All wrap'd up in love; Of the white tapering arms, And cheeks all aglow, Of the sweet witebing creature A making np deagh.

I concluded each evening To visit the well. And draw up the water, Entranced by the spell That gleam'd from the window, Untit I should know The Angelie ereature A making up dough.

5- and tucky evening-I remember it well-Just as I was leaving, I stumbled and fell: My head struck the window-It frightened her so-The timid young creaturs A making up dough.

All matters explained, She laugh'd at her fars, And blushed when I told her The fault was all hers: Te me, nothing more heautiful, E'en the roses that blew. Than the witching young creature A making ap deagh.

Time, with his troubles, Itas rolled on each year. Changing joy into sorrow And doubt into fear, And I sigh at the changes-The roses to snew -On the cheeks of my darling Who made up the dough.

Mynheer Van Baerle, the father, had amassed in the Indian trade, three or four hundred thousand guilders, which Myuheer Van Baerle, the son, at the death of his deur and worthy parents, found still quite new, although one eet of them bore the date of coinage of 1640, and the other that of 1610, a fact which Baerle the father, and of Van Baerle the grandfather; but we will inform the reader at once, that these three or four hundred thousand guilders were only the pocket-money, or a sort of purse, for Cornelins Van Bearle, the hero of this story, and his landed property in the province yielded him an income of about ten thonsand guilders a year.

When the worthy citizen, the father of Cornelius, passed from time into eternity, three months after having buried his wife, who seemed to have departed first to smooth for him the path of death as she had smoothed for him the path of life, he said to his son as he embraced him for the last time, -

> Van Baerle was truly beloved by his servants and laborers; nor had he uny conception that there was in this world man who wished ill to another.

And yet it must be said, to the disgrace of mankind, that Cornelius Van Baerle, without being aware of the fact, had a much more ferocious, fierce, and implacable enemy than the Grand Pensionary and his brother had among the Orange party.

At the time when Cornelius Van Baerle began to devote himself to tulipgrowing, expending on this hobby his "Eat, drink, and spend your money, if yearly revenue and the guilders of his father, there was nt Dort, living next door to him, a citizen of the name of Isaac Boxtel; who, from the age when he was able to think for himself, had indulged the same fancy, and who was inecstacies at the mere mention of the word

Boxtel had not the good fortune of being rich like Van Bacrle. He had, therefore, with great care and patience, and by dint of strenuous exertions, laid out near his house at Dort, a garden fit for the culture of his cheerished flower, he had mixed the soil according to the most approved prescriptions, and given to his otbeds just as much heat and air as the strictest rules of horticulture exact.

Isaac knew the temperature of his frames to the twentieth part of a degree. He knew the strength of the current of nir, and tempered it so as to adapt it to the wave of the stems of his flowers. His productions also hegan to meet with the favos of the public. They were beaularge honse. In vain his godfather of- tiful, nay, distinguished. Several fanciers had come to see Boxtel's Julips. All at once. Cornclins Van Baerle, who, after all his learned pursuits, had been seized with the tulipomania, made some changes in his house at Dort, which, as we have stated, was next door to that of Boxtel. He raised a certain building in his courtyard by a story, which, shutting ont the sun, took half a degree of warmth from Boxtel's garden, and, on the other hand, added half a degree of cold in the winter; not to mention that it cut the wind, and disturbed all the horticultural circulations and arrangements of

After all, this mishap appeared to Box tel of no great consequence. Van Baerle was but a painter, a sort of fool who tried to reproduce, and disfigure on canvass the wonders of nature. The painter, he thought, had raised his studio by a story to get better light, and thus he had only been in the right Mynheer Van Baerle was a painter, as Mynlicer Boxtel was a tulip grower; he wanted somewhat more sun for his paintings, and he took half a degree from his neigobor's tulips.

The law was for Van Baerle, and Box-

el had to abide by it. Besides which, Isaac had made the disovery that too much sun was injurious to tulips, and that this flower grew quicker, and had a better coloring, with the temperate warmth of morning, than with the powerful heat of the inidday sun. He, therefore, felt almost grateful to Cornelins Van Baerle for having given him a

screen gratis. May be this was not quite in accordance with the true state of things, in general, and of Isaac Boxtel's feelings in parficular. It is certainly astonishing what rich comfort great minds, in the midst of mnuntainous cafastrophes, will derive from the consolations of philoso-

But, alas! what was flic agony of the untortunate Boxtel on seeing the windows of the new story set out with bulbs and seedlings of tulips for the border, and tulips in pots; in short, with everything pertaining to the pursuits of a tulip-fan-

There were bundles of labels, cupboards, and drawers with compartments, and wire-guards for the capbourds, to allow free necess to the air whilst keeping out flie slugs, mice, dormice, and rate.

This happy mortal, rard down, was cop of honor was offered to him, readily all this apparatus, but he was not as yet

Van Baerle was known to be fond of evervthing that pleases the eye. He studied nature in all her aspects for the benefit of his paintings, which were as minutely finished us those of Gerard Dow, his mas-

ter, and of Mieris, his friend. Was it not possible, that, having to paint the interior of a tulip grower's, he had collects ed in his new studio all the accessories of decoration? Yet, although thus consoling himself with illusory suppositions, Boxtel was not

able to resist the burning curiosity which was devouring him. In the evening, therefore, he placed a ladder against the partition wall between their gardens, and, looking into that of his neighbor Van Baerle, he convinced himself, the soil of a large square hed, which had formerly been occupied by different plants, was removed, and the ground disposed in beds of loam mixed with river mud (a combination which is particularly favorable to the tnlip), and the whole surrounded by border of turf to keep the soil in its place. Besides this, sufficient shade to temper the noon-day heat; aspect S.S.W.; water in abundant supply, and at hand; in short, every requirement to insure not only success but also progress. There could not be a doubt but that Van Baerle had become a tulip-grower.

Boxtel at onec pictured to himself this earned man, with a capital of four hundred thousand, and a yearly income of ten thousand guilders, devoting all his intellectual and financial resources to the cultivation of the tulip. He foresaw his neighbor's success, and he felt such a sang at the mere idea of his success, that his hands dropped powerless, his knees trembled, and he fell in despair from the ladder.

And thus it was not for the sake of painted tulips, but for real ones, that Van Baerle took from him half a degree of warmth. And thus Van Baerle was to have the most admirably fitted aspect, and, besides, a large, airy and well-ventilated chamber, where to preserve his bulbs and seedling; whilst he, Boxtel, had been obliged to give up for this purpose his bed-rrom, and, lest his sleeping in the same apartment might injure his bulbs and seedlings, had taken up his abode in a miserable garrett.

Boxtel, then, was to have next door to him a rival and successful competitor; and his rival, inctend of being come unknown, obscure gardener; was the godson of Mynheer Cornelius De Witte, that is to say, a celebrity.

INTERVIEWING A PARMER. The Discouragement of a Crop Reporter.

[Louisville Ledger.] Wishing to keep posted us to the condition of the crops, and to ascertain the exact amount of damage done by the recent flood, a reporter of the Leager started out this morning ou an interviewing expedition. He was fortunate enough to encounter a farmer at the edge of town, bringing n load of hay into the city. Burning with enthusiasm, the reporter hailed him. He halted, and the following colloquy took place:

"llow are you, friend?"? "Tired,"

"What's hav now?"

"Same as it always was."

"What's that?" "Dried grass."

"What did you think of the rain?" "Thought it was damp."

"Didn't raise anything then, eh?" "Nothing but an umbrella."

"What did your neighbors get?"

"Chills and fever." "What are you doing now?" "Sitting out here in the sun, and maybe

missing a chance to sell this hay. Come up here if you want to talk. The reporter scrambled up to the side of his new made acquaintance, and as they jolted on he agnin produced his note book and continued.

"What did the farmers do last spring?" "Ran everything in the ground as usnal."

"Did your wheat do anything?" "Yes."

"Spronted."

"Can you raise any tobacco?" "Yes. Do you want a chew?" "How are the potatoes?"

"Under the weather somewhat, but able to be ont." Becoming just the least bit discouraged, the reporter asked timidly:

> Remembering that it was just about ime to report at the office, the baffled eearcher after news climbed down the side of the wagon, and thinking that a soft answer turneth away wrath, he calmly said:

"That's nice hay, my friend; where did it come from?"

"Timothy seed," was the reply. The interrogater grew faint, but h ummoned up conrage enough to ask: "What do you think you will get for

"Cush of course. Get up whitey, this ellow will talk us blind in a minute. He asks more questions than a catechism." and before the discouraged representative of the press could recover from his eurprise, the hay wagon had turned an adjacent corner.

Farmers and Newspapers.

We have been frequently surprised to see how many farmers well to do in worldly riches, neglect or refuse to take some good paper for the benefit of himself and family. They seem to think they have no interest in the affairs of the of the by-gone days. world; that they have to deal with nothing except the land they plow or the stock they feed, and their children rearing into ignorance. They forget they are a part of the human family, placed upon this wise Creator, and as such have no right for the sick. to hamper the great streams of progress.

The luws of progression are as unalterable as uny others of nature and that man who impedes those laws with an offspring-children uneducated and besorted with ignorance-commits a sin which reacts not only upon himself but on his decendents for long years in the future.

Newspapers are made to spread intelligence and improve the morals of mankind. The Southern Mocking Bird. Methodist Recorder.

But we must throw aside a handful of botanical specimens, and a page of memoranda for letter writing, else we should linger in these Mississippi woods all summer. Hark! "Listen to the mocking!" Yonder on that water oak, how proudly he balances himself on the swinging bough. Will he sing? Yes. Only hearken. His notes are clearer than the notes of a flute, more shrill and ringing than the falsettos of the most perfect flageolet, endless in variety as if his octaves reached into the etherly skies, and modulated with a grace beyond the range of words to express. He takes up the song of the thrush, the time-beat of the robin, the caroling of some distant swallows too faintly remote for our coarse ears to hear, the victor call of the lark mounting into the face of the sun, the chattering of the blue bird' and a score of remembered cadences from summers that are gone, and -hearkenl lle transposes them into a new creation. His original variations surpass Gottschalk'a grandest liberties with "Home sweet Home." Young Widows,

Dr. Ausfin Flint, of New York, an eminent physician and geutleman, has written an elaborate essay on the impororb to work out the plans of the good and tance of having trained and skilled nurses

We fully agree with the learned Doctor. It is important. But where, outside of hospitals, are such nurses to be found? They can only be obtained by teaching wives and mothers-not the aged but the

A marvelous piece of mechanism, in the way of clocks, is described in the French journals. It is an eight day instrument, with dead-beat escapement maintaining power. It chimes the quarters, plays sixteen tunes, plays three tunes every twelve hours, or will play at any time required. The hands go round as follows: one, once a minute; one, once an hour; one, once a week; one, once a moon's age; the rising and setting of the sun; the time of high and low water, half ebb, and half flood, and, by a beantiful confrivance, there is a part which represents the water which rises and falls, lifting some ships at high water tide as it they were in motion, and as it recedes, leaves theee little automaton ships dry on the sands. The clock shows the hour of the day, day of the week, day of the moneli, month of the year, and in the day of the month there is provisions made for the long and short months. It shows the sign of the zodiac; it strikes or not, it chimes or not, as may be desired; and it has the equation table, showing the difference of clock and sun every day of the

AGRICULTURAL

Middlemen.

I am no Granger, though not unfavorable to the Order. I bid God speed the Patrons of Husbandry do not too far lose sight of its original principle, I believe it will do good. Still, I do not propose to join them, as I believe the good they will no could be accomplished in a better way. But this is not what I intend to write about. Middlemen is my theme—the hunted, despised, forsaken middlemen. The Grangers say they want to make them producers, instead of useless consumers. The object seems to be to drive them on to the farm, make them plow, sow, reap and mow, and add to the already overflowing graneries of the West. Would this really benefit the farmer? Is it to his interest to increase the number of producers? Would it not be better to double the number of consumers? This is the very difficulty, itself, in the West. There are too many producers, and not enough consumers. This is what makes low prices and hard times. Grain must be shipped across the continent and to Europe, at an enormous expense, to obtain buyers. If an army of middlemen, with plenty of money, were let loose in each of the great grain producing States to-day, we should see prices run up rapidly, and better times would come at once. All the traders of the country are middlemen, strictly, and their number is legion. They must live, and to their activity and energy the farmer is largely indebted for what little stir there is in the financial world. Banish all these consumers, or worse yet, turn them to producers of farm products, and the farmer would very soon pray to be delivered "from him-

This question is regarded by Grangers only on one side. They can see nothing but the 'commission ye middlemen gets," and the benefits, the advantages, are totally disregarded. Give the devil his due. If you want to fight, "take a man of your own size." Go for monopolies, and corruption in high places, and ignorance and superstition in low places, and all the various forms split from top to bottom. He could fully enlightening the agricultural of evil that exist in the land. Don't not walk without his feet spreading begrudge the merchant his little "five apart. I kept him for three months

REPRESENTATIVE AND CHAMP-ION OF AMERICAN ART TASTE

PROSPECTUS FOR 1875—EIGHTR TEAR

THE ALDINE THE ART JOURNAL OF AMERICA,

ISSUED MONTRLY.

MAGNIFICANT CONCEPTION WON-

DERFULLY CARRIED OUT.

The necessity of a popular medium for the representation of the productions of our grees artists has always been recognized, and many attempts have been made to meet the west. The successive failures which have so lavariably followed each attempt in this country to establish an art journal, did not prove the indifference of the people of America to the claims of high art. So room as a proper appreciation of the want and an ability to meet it ware shown, the public at once rallied with enthesiasm to its support, and the result was a great artistic and commercial triumph—THE ALDINE.

The Aldine while issued with all of the regularity, has none of the temperary ar timely interests characteristic of ordinary periodicals. It is an elegant miscellany of pure, fight, and graceful literature, and a collection of pictures, the rerest collection of artistic skill, in hisek and while. Although such succeeding number affords a fresh pleasure to its friends, the rest value and beauty of The Aldine will be most appreciated after it is bound up at the close of the year. While ather publications may claim an perior occupance, as compared with rivals of a similar class. The Aldine is a naisone and

The national feature of The Ald'ne must be taken in no narrow sense. True art is cosmopolitan. While The Aldias is a strictly American institution, it does not confine itself to the peproduction of native art. Its mission is to cultivate a broad and appreciative art taste, and that will discriminate an grounds of intrinsis merit. Thus, while pleading before the pairons of The Aldine, as a leading characteristic, the productions of the most moted American artists, attention will always be given to specimens from foreign masters, giving subscribers all the pleasure and instruction obtainshie from home or foreign sources.

pleasure and instruction obtainable from home or foreign sources.

The artistic illustration of American occurry, original with The Aldine is an important feature, and its magnificent plates are of a siss more appropriate to the satisfactory treatment of datails than can be afforded by any inferior page. The indicious interspersion of land-cape, marine, figure and animal subjects, snetain an unabaled interest, impossible where the scope of the work confines the artist too afceely to a single style of subject. The literature of The of the work confines the artist too alosely to a single style of subject. The literature of The Aldine is a light and greefin eccompaniment, worthy of the artistle features, with only such technical disquisitions as do not interfet the popular interest of the work.
